PROGRAM OUTCOMES:

In our Mechatronics program, you will explore computer-automated machines and develop problem-solving and troubleshooting skills in mechanical, electrical, fluid power, and programming areas.

Courses include electronics, pneumatics, hydraulics, science, programmable logic controllers, motors, transformers, motor controls, pumps, and mechanical systems.

PROGRAM LENGTH:

Diploma hours: 720 AAS hours: 645

A probationary period of hours of 500

CERTIFICATION:

Automation Certificate
Control Systems Certificate
Fluid Power Certificate
Industrial Technology Certificate
Instrumentation Certificate
Process Control Certificate

ON-THE-JOB LEARNING COMPETENCIES:

- Test electrical equipment or systems to ensure the proper functioning
- Maintain repair or maintenance records
- Test mechanical equipt to ensura Install electrical components, equipment, or

systems

JOB FUNCTIONS:

- Test faulty equipment to diagnose malfunctions, using test equipment or software and applying knowledge of the functional operation of electronic units and systems
- Maintain equipment logs that record performance problems, repairs, calibrations, or tests
- Set up and test industrial equipment to ensure that it functions properly
- Inspect components of industrial equipment for accurate assembly and installation or for defects, such as loose connections or frayed wires
